

THE GLEICHEN CALL

VOLUME XXXIII NO. 8

GLEICHEN, ALBERTA, WEDNESDAY MAY 8, 1940

SUBSCRIPTION \$2.00 PER YEAR

FISH AND GAME ASSOCIATION SEE PICTURES

The Gleichen branch of the Fish and Game Association held a meeting one evening last week to which quite a number of people attended.

W. C. Fisher, of Calgary, president of the Alberta Fish and Game Association and Mr. Kjar, Chief game inspector for the province, were present. Mr. Fisher brought along his picture machine and displayed a number of reels of pictures which took up most of the evening and proved to be very interesting.

Mr. Kjar addressed the meeting and spoke on the imperative need of a vigorous drive to destroy pests of the game birds such as crows.

Al Wilson of the local association spoke for a few minutes and announced that the fee for a license would be paid for each crow destroyed during May.

The Gleichen association will in the near future hold another meeting for organization purposes at which Calgary men will attend. At this meeting pictures about the progress made in duck conservation. During this month the club proposes to hold a cross shoot which will be a gala affair.

Anyone who would like to become interested in the association should contact Al Wilson, Vice-President, Bob Brown or Secretary Bert James.

OBITUARY

PHILLIP JOHN UMBRITE

Phillip John Umbrite, father of Ralph Umbrite, died at the latter's home Saturday after an illness of some time, at the age of 80 years. Deceased was born in Wisconsin and with his family moved to Gleichen in 1906 and bought a farm five miles north west of town. During the years of his residence on the farm he took much interest in community affairs. In 1920 he sold the farm to his son Ralph and retiring with Mrs. Umbrite moved to Banff where a few years later Mrs. Umbrite died. Mr. Umbrite lived in Banff until about three years ago when owing to his advanced age and failing health his son Ralph brought him to Gleichen. He is survived by two sons, Ralph of Gleichen and St. John of Richmond, Wash. Funeral services were conducted in Banff Monday burial taking place there.

DAVID YULE

David Yule, a resident of Gleichen for the past 31 years, died suddenly Wednesday night from a heart attack. Mr. Yule had been ill since last June and for the past six months had made his home at the Queens Hotel. He was up and about every day and it was a great surprise to his friends when it was announced that he had been found dead when his breakfast was brought to him. Dave was born in Keith, Scotland, 60 years ago, coming to Canada by ship and year or so in Manitoba then moved to Gleichen. Here he entered the lively stable business with Jack Burr and operated it for some years. Later when autos finished the stable business opened up a garage and used it for living purposes. He then quit the garage and bought a farm north west of town where he lived until his health failed and he moved to town. The funeral service was held in United Church Saturday afternoon with Rev. J. N. Wilkinson officiating, after which interment was made in the local cemetery. Deceased is survived by two brothers: George of Edmonton and William of St. John's, sister in Scotland. He was predeceased by two sisters and one brother.

Among the floral offerings the following were noted: Mr. and Mrs. George Yule and family; Mr. and Mrs. David Yule and family; Mr. and Mrs. A. Plante and family; Mr. and Mrs. Bert Stott and family; Mr. and Mrs. Geo. Macdonald and family; Mr. and Mrs. W. Brown and family; Mr. and Mrs. H. E. James and family; Mr. and Mrs. Bob Brown; Betsy Hagen, Bert Hoen Lee Woods, Don Beattie; Queens Hotel and staff; Mr. and Mrs. J. Black.

THE WORLD OF WHEAT

At the suggestion of the Dominion

Empire Day Sports to Feature Baseball Display

On Empire Day, May 24th, the Gleichen Agricultural Association will be usual put on their annual celebration at the fair grounds when all kinds of sports for old and young will be run off. Although seeding is late this year and many no doubt will be very busy around May 24th there should be a large attendance as this is the first summer holiday of the year.

Of course the big event on the program is the baseball tournament between teams representing Bassano, Arrowwood, Standard and Gleichen. The draw to see what teams will play the first game will take place in the morning shortly before dinner. The second game will be called at 1:30 p.m. The third and final game, between the winners of the first two games, will take place about 6 o'clock in order to get finished before it gets dark.

There will be sports of all kinds for the small folks during the afternoon. An attractive program of events is at the present time being drawn up for them by the committee in charge of that part of the program.

When the shadows of night have closed down on the big day bright lights will burn in the Community Hall where Brimmer's Orchestra will play for the dance which will last until sometime the next morning.

W. Sturmeister who has charge of the advertising of the big show, announces that posters giving details of the day's sports will be out in a day or so.

FOREIGN EXCHANGE CONTROL BOARD DISPLAY CARDS

Merchants and others catering to the tourist trade who will accept United States currency will be permitted to display an official card provided by the Foreign Exchange Control Board. The card, bearing the crest of the Dominion of Canada, will be available in two sizes: 11x14 inches and 5 1/2 x 7 inches. The larger card is suitable for window display. Both will carry the same legend: "United States Currency is accepted here as the official premium set by the Foreign Exchange Control Board."

Mr. and Mrs. R. B. Hayes and family attended the graduation of their daughter Verona of the Gen. Hospital in Calgary. The Gen. Hospital extends congratulations to Miss Hayes.

MR. AND MRS. ROUCHE CELEBRATE SILVER WEDDING

Mr. and Mrs. Claude Rouche were taken by surprise when a number of their friends dropped in at their home Monday evening, April 29th to celebrate with them their silver wedding anniversary. What was played during the evening at seven tables, the prize winners were: Julius (first Mrs. C. Rouche); George (first Mr. C. Nelson); consolation prizes going to Mrs. Calkins and Ralph McArthur. An enjoyable time was enjoyed after which Mrs. Rouche presented Mr. and Mrs. Rouche with a silver cream jug and sugar bowl also a silver bonnet dish. Mr. and Mrs. Rouche expressed their thanks for the presents. Songs were sung by Bob Dobson, Jimmy and Johnny Rouche, Mr. and Mrs. E. McArthur, Pauline Rouche and Mrs. A. McArthur with Mrs. C. Kilcup at the piano. The evening was much enjoyed by all present. Claude was much worried because he did not get his cows milked that evening.

An experimental farms, in 1938, the Crop Testing Plant seeds a large number of special plots in Alberta. On half the plots the weeds were permitted to grow in the same way that they would grow in a farmer's (Continued on another page.)

FROM THE FILES OF GLEICHEN CALL TWENTY YEARS AGO

G. H. Goodenham, Indian agent, has received instructions from Ottawa to call for tenders for the erection of 44 cottages and 45 barns on the Blackfoot reserve. The erection of this buildings, with other improvements that must necessarily follow, means an expenditure of well on to \$200,000 this year in the vicinity, which at this particular time will be much appreciated. The new houses for the Indians will be on about the same dimensions as those now occupied, but the barns will be larger.

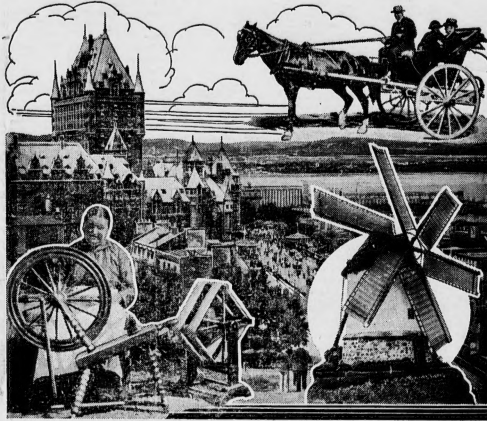

The delay in seeding with the long sweep of snow and rain has proved a serious problem. Most horses were taken from the stubble in the latter part of March to be fed more solid feed a few days before seeding. As it has turned out there is practically no seeding done yet and the horses have been fed in idleness during this period. This condition, with the cattle eating their share, has almost completely exhausted the supply of local feed, and most farmers who had enough feed to at least do their seeding find the feed supply gone and no seeding done.

There is still quite a lot of flax to be threshed in the Arrowwood area. Mr. Douglas, S.S.B. land inspector and W. S. B. are looking over the lands in the district. No use trying to beat Bud. Mac. He had all his wheat in before the recent snow storm.

It is said that the packers have taken full advantage of the bad roads conditions this spring to drop the price of hogs as soon as they were coming on the market in large numbers. It is even reported that American pork has been imported and resold here. As bacon prices across the line have been low the packers make it coming and going. No matter what price the farmer receives for his hogs the packer gets the guaranteed price from the British buyers. Of course there is no such thing as the farmer getting a guaranteed price. After having been told to raise more hogs and help him the way he must be content with what he can get.

The roads are slowly getting in shape and any one can take old Lizzie down a few side walks without heading into a slough. The 22nd Battery is out again among the green fields and flowers the line is carrying on gun drill and signalling. Lieut. G. Yates, of the 22nd Bat-

Quebec Expects Banner Tourist Season

The Great Gates of Quebec's ancient city wall—originally designed to discourage hostile visitors—will be thrown open this summer for a large scale tourist invasion, expected to top all previous records. With most of Europe's Old World charms affected by wartime conditions, increased numbers of Canadians and Americans will take advantage of Quebec's historic surroundings and fine sporting facilities.

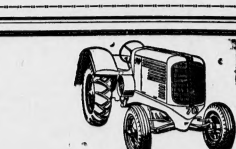

Combining the charm of the past with the luxuries of the present the Chateau Frontenac is the centre of the city's social and sports activities. Dominating the city's skyline, the majestic Canadian Pacific hotelery is within easy distance of the city's outstanding points of interest—its ideal headquarters for the visiting tourist. DuRoi Terrace, adjacent to the hotel, offers an ideal view of the historic "Lower Town" and the broad St. Lawrence.

Though possessing ideal facilities for practically every modern sport, Quebec's chief fascination to the tourist lies in its Old World charm. Its narrow, winding streets, lofty spired churches, cobbled and quaint domes, dwellings are reminiscent of medieval Normandy. Its not-so-peaceful years are recalled by battlefields, grim stone forts and ancient cannon.

Nearby points of interest include the Lorette Indian Reservation, the Isle d'Orleans, unspoiled by the rush of civilization, the shrine of the Anne de Beausang and the Montmorency Falls. For the sports enthusiast there are fine facilities for golf, tennis, and badminton, while miles of colorful highways beckon the motorist. Laurentide National Park, 30 miles from the City, is a paradise for fishermen, canoeists, camera fans and nature lovers. Quebec City is easily accessible over Canadian Pacific lines, and is conveniently connected with important centres in eastern Canada and the United States.

city, is home again from Edmonton university. Before he left the C. A. T. C. was inspected by Brigadier Consoli, D.S.O. There were nearly five hundred students taking the course.

Com. W. K. Brown left for Calgary last week for a visit. Most of Bill's friends were busy gardening which made it somewhat lonely for him.

Statistics show that sheep breeders in Canada lose about a million dollars a year through the attacks on their flocks by dogs. Not much sense in putting bonuses on wild animals and allowing stray dogs to run at large.

most war fronts and events at which we can only guess are likely to follow in rapid succession. No one can predict what may take place from one day to the next, but in view of enemy propaganda belittling the Allies we would advise those who do not remember the many reverses suffered by our armies during the last war to refrain from getting the wind up. Hitler blithering has endangered and blizzed for eight months now and while he has sunk the entire Allied navy several times over the air the German navy and the air force and submarines which were not destroyed the Allies at once have not lived up to the boasted predictions of the Blitzkrieg.

Opportunities In Trees

Considered solely from the economic viewpoint it is satisfactory to note that the federal government has evidently decided that the annual summer expeditions of the forestry association's tree planting train are not to be sacrificed to the exigencies of war.

By the time this appears in print the train will already be perambulating through those portions of the prairie provinces which have found a place in this season's literary and from their cars crowds of prairie folk are learning, orally and visually, the immense value of a tree in the economic and aesthetic life of the country.

To what might have been expected, the past decade of drought and depression has given a new impetus to the work of tree planting on the open prairies and the necessity of conservation of trees in the forested portions of the west has been brought home to thousands of western residents as a result of the continued mission of the forestry association's train.

During this ten year period of trial and tribulation, farmers and others have learned by bitter experience that the absence of trees has spelled soil erosion and that soil erosion plus drought, has brought about storms wreaking at least temporary destruction to large tracts of arable areas in the southern portions of the prairie provinces. In the park belted and treed areas of the prairie provinces, people have been able to see the keenly aware of what has been happening in the southern districts and have undoubtedly been impressed with the necessity of conserving their protective device—the trees.

It is not surprising, therefore, to find that during the depression, interest in tree planting and conservation of forests has deepened materially and that this augmented interest has found expression in record attendances at the lectures brought to their doors by the tree planting train and by increased demand on the facilities of the Dominion forestry farms for trees and shrubs.

Wider Area Offered

A further stimulus to the growing interest in tree planting and arboreal conservation has been given during the past three or four years by the activities of the Prairie Farm Rehabilitation organization who are promoting the growth and cultivation of trees as one of the activities essential to the retention and use of all available moisture.

Instead of the war acting as a deterrent upon this important and highly necessary undertaking it should serve as a major factor in giving an additional impetus to programs of tree planting and forest conservation of the part of the individual, the community and the governments of the country, for it would appear that trees may be destined to play an even more important role in our economy than heretofore, as a result of the conflagration in Europe.

One of the immediate effects of the war in prospect is a very substantial increase in tourist traffic from the United States. It can be taken for granted that these prospective visitors will not only look for good roads and courtesies but they will search for attractive scenery and that means addition to beds of golden grain and rest farmsteads, the restful greenery of trees. If they do not find this greatest of assets to a holiday-maker, they may be expected to move on to some other section of the country which has something more tempting to offer them and which will reap the benefit of the money they have to spend.

It appears also as if the war may open a new vista of wealth to be derived from the forests of this country. Even before Norway had been invaded by Hitler's troops Roland D. Craig, chief economist of the Dominion Forestry Service at Ottawa announced at the annual convention of the Canadian Society of Forestry Engineers that new markets will be opened to Canadian wood because the Baltic countries and eastern European timber producers have been practically shut off from world trade routes.

"The United Kingdom," said Mr. Craig, "will be dependent largely upon Canada for her entire wood requirements, particularly for military uses, and the United States, a heavy importer of wood pulp from the Baltic and from Europe will probably turn to Canada for a greatly increased supply of that forest product."

A Permanent Crop

So that in more than one direction the war is opening up opportunities to augment existing industries and to create new ones in which forest resources and trees may play an important role if advantage is taken of these opportunities, but to make the most of the situation it is necessary that more trees be planted on the open prairies in the south and in the north the forest resources must be carefully managed so that the industry may continue to be profitable for all time.

As Arthur A. Schmon, president of the Canadian Forestry Association, said at the convention already referred to: "Forest resources must be recognized by every Canadian household as a national pride and as a bulwark of our common well being. We want them accepted as the one permanent crop to be kept growing on nearly a third of our habitable area."

Burlap in Great Demand**Needed in Large Quantities For Sandbags During Wartime**

The commodity whose price is perhaps most sensitive of all during wartime is not copper, nor steel, but ordinary burlap. Burlap is needed in enormous quantities for sandbags and its price since last September has varied from six to 11 cents per yard. The British government has had to buy 600,000,000 yards and a world shortage is increasing, the use of cotton sacking and paper bags for commercial packaging.

As an aid in overlapping aerial photo maps of Australia, the snow wastes, photographers drop bombs of carbon black powder on the snow.

The Magnetic Mine

How Britain Was Able To Deal With This Menace To Shipping

(By A Naval Correspondent)
Mines are laid on the sea bottom, and are only effective if ships passing over them are inside the danger area of the explosion. They are useless in depths of 300 feet or more, and are thus complementary to the ordinary moored mines floating beneath the surface and designed to fire on a ship striking them. The development and laying of magnetic mines forced Britain to provide special methods of clearance over and above the ordinary sweeping of moored mines.

As regards the antitide, much has recently been heard of "de-gaussing" belts fitted to ships of all types from trawlers to battleships, for the purpose of neutralizing their magnetism and so rendering them immune from magnetic mines. Dr. Gauss, one believes, was a Scandinavian professor who died in the middle of the 19th century; but gave his name to the unit of magnetic flux, just as the names of Ohm and Ampere are now used in the technical language of electricity.

The "de-gaussing" belt or grille, or "D.G." equipment, as it is now called, consists of a number of strands of ordinary insulated cable strung round the ship about the level of the upper deck, and energized in a special way by an electrical current. It is supposed to be a permanent magnetism of the vessel, so that she is able to pass over a magnetic mine without deflecting the needle and firing the charge.

Total immunity against mines, magnetic or otherwise, can never be guaranteed. However, no ship fitted with the new gear has yet been damaged, while an officer responsible for its development expressed himself as being prepared to take "a good guess" over any number of magnetic minefields.

It should be added that the apparatus which was suggested by the officers of one of His Majesty's Naval Establishments, with the able advice and assistance of naval scientists, was developed in less than three months from the time the need for it became apparent.

Supplies Cut Off

Clothespins Are Scarce In England On Account Of War

It's a "lovely" war for the British household. She wants to hang out the washing on the home front but cannot because there is a scarcity of clothespins.

Apart from the few made by typists, they never were manufactured in England on a large scale. Before the war 392,000,000 pegs were imported annually, mainly from Germany.

As if the pin question and planning family meals under rationing were not enough, the war has put at hand about makers of mouse traps experiencing a scarcity of wire. The trap-makers at Leeds face this difficulty due to the use of wire in making anti-magnetic mine apparatus.

Christians have been so scarce in many districts that women introduced "staggered" washing days and others used safety pins. To meet the difficulty a firm of spring manufacturers plans turning out 5,000,000 spring pegs a week. Due to labor costs, they may have to be sold at about sixpence (11c) a dozen compared with the old price of 12 wooden pegs for a penny.

Made Slight Mistake

Auctioneer Got His Addresses Mixed And Sold Wrong House

While Mr. and Mrs. Norman Goodwin, of Quincey, Mass., were away from home on a brief vacation, an auctioneer of the Home Owners Loan Corporation put up a red flag on sale plaza and within a half hour sold their house and two-car garage to the highest bidder.

The Goodwins have owned their home for 16 years. The auctioneer had made a mistake in the address and should have auctioned the house next door.

According To Old Legend The origin of tea is credited to a legendary Buddhist named Bodhidharma, who in the midst of a nine-year penance without sleep started to doze. To punish himself he plucked out his eyebrows and threw them on the ground. From them sprouted the tea plant, and by eating the leaves of it he managed to keep awake for the duration of the penance.

Matches first were sold under the name of "Lucifers."

Gold, when ground to a fine powder, is dark red, or black.

New Wireless School

Established Under Air Training Plan At University Of Manitoba

Establishment of a wireless school of the British commonwealth air training plan in buildings of the University of Manitoba at Winnipeg was announced by Hon. C. G. Power, acting minister of national defence.

Mr. Power expressed appreciation of the "patriotic attitude of the president of the university, Sidney E. Smith; the chairman of the board of governors, Mr. Justice Dwyer, and other members of the board in placing such facilities at the disposal of the Royal Canadian Air Force for the duration of the war."

The school will be the second of four wireless schools, projected under the plan which provides for the training of pilots, air gunners and air observers for the British, Australia, New Zealand and Canadian air forces.

Another school now is operating in Montreal and the Winnipeg establishment will be along similar lines except that it will concentrate on the training of air crews while at Montreal signals officers, ground operators and wireless and electrical mechanics required under the plan will receive their training.

The Winnipeg school will provide accommodation for the training of more than 1,000 airmen as wireless operators.

The student residence at the university which now accommodates 450 students and staff members and has a restaurant capable of serving 1,000 people will form the nucleus of the school. Other buildings will be used for instructional purposes and additional buildings for class rooms will be erected on adjacent property.

Will Survey Housing

Next Census Expected To Include General Living Conditions Query

A survey of housing in Canada will be made in connection with the 1941 census, according to plans already prepared by the Dominion Bureau of Statistics but subject to final approval by the Government.

The census takers will ask Canadians about the types of houses they live in, the type of construction and the type of heating system. They will inquire whether houses have bathrooms and refrigeration and what kind of fuel is used.

Questions also are set down on the preliminary census form relating to the number of people in the house, type of construction and the rent paid.

Only the other day the Ontario Association of Real Estate Boards convention in London approved a resolution asking the Federal Government to obtain information on property and housing conditions during the 1941 census taking.

Made A Salad

One of the earliest stories of tea drinking in the western hemisphere is that of the seventeenth century hostess who, on being presented with a pound of tea, cooked it and served it to her guests with butter, salt and pepper.

A game similar to American football was played by the youths of Sparta 2,500 years ago, history reveals.

Mr. Caffeine-Nerves Foiled Again!

FATHER: Stop that infernal racket! How do you expect me to work all day and come home and listen to that! My nerves can't stand it!

MR. CAFFEINE-NERVES: Bravo! That child needs to be cured!

MOTHER: One of the club girls claim that too much tea and coffee can make people nervous and out of sorts. Maybe it isn't junior at all. Let's try drinking only Postum for awhile and see!

MR. CAFFEINE-NERVES: To hear her you'd think you lived on tea and coffee!

10 DAYS LATER

FATHER: Whoever told you about Postum certainly deserves a medal! My trouble was caffeine-nerves all right! Postum instead of tea or coffee soon put an end to it!

MR. CAFFEINE-NERVES: Postum again! It chases me every time!

Many people can safely drink tea and coffee. Many others—and all children—should never drink them. You, one of these, say Postum's 30-day test. Buy Postum and drink it instead of tea and coffee for one month. Then if you do not feel better, return the container up to General Foods, Limited, Cobourg, Ontario, and we'll gladly refund full purchase price, plus postage. Postum is delicious, economical, easy to prepare, and contains no caffeine.

Most Perfect In World

Whispering Gallery In Italy Is Shaped Like Human Ear

The "Ear of Dionysius," one of the most curious and perfect whispering galleries in the world, is located in the ancient city of Syracuse, Italy. Formed more than 5,000 years ago when Greek slaves accidentally quarried out rock from a limestone cliff in the form of a human ear, the gallery is 50 feet high and extends back into a soft hill for 200 feet. Its acoustics are so perfect that the sound of a pebble being torn is carried back perfectly by the echo. It is named for the Emperor Dionysius, who used it for a prison and had a small room built at the top where he could sit and listen to what his prisoners were whispering about.

At a speed of 62 miles an hour, an automobile uses about 60 per cent of its power in overcoming air resistance.

New Airplane Device

Bombay Engineer Evolves System For Reducing Landing Speed

Aeronautical research engineer for the Indian government, Phiroze P. Nazeer conferred with officials of the British commonwealth air training plan in regard to a device to decrease the landing speed of fast aircraft.

The 32-year-old Bombay engineer described his device as a cut slot and flap in the trailing edge of an aircraft wing. Its function would be to act as an air brake when lowered into position for a landing. Similarly, the flap would give increased lifting power for aircraft taking off from confined areas.

The Indian government has financed development and patent costs of the device.

It is possible for an airplane to make a safe landing with only one propeller.

CHAPTER III—Continued

Through the Window

"You mustn't go, you'll be killed!" she gasped, and in another instant he lit his pipe, for the room was virtually lit.

"I've got a pretty high regard for you," he said, and in another instant he had swung clear and gripped the lower ash of the second window and had pulled himself into the room.

He could see nothing except the rim outline of three trucks stacked one on top of the other, switched on the light and turned to survey the confusion. Old boxes and trunks which, he guessed, had been piled in some order, were dragged into the centre of the room to allow the free operation of the vanished burglar. Recessed into the wall, thus cleared, was a safe, the door of which was open. On the floor beneath a rough circle of metal burned from the door—it was still hot when he touched it—by the small hydrogen blow-lamp that the burglar had left behind him.

He unlocked the door of the room and admitted Elks and the girl.

Released on Wednesday

"That's good work," said Elks, who detached admiration for the genius of law-breakers was at least tacit. "That's good work." Not much as a cigarette ash left behind. Good work? Try Haggitt or Lew Yakobi—they're the only two men in London that could have done it."

The girl was gazing wide-eyed at the "good work." She was very pale, Jim noticed, and misread the cause.

"What was in the safe?" he asked.

She shook her head.

"I don't know—I didn't even know that there was a safe in the room. He will be terrible about this!"

Carlton knew the "he" was the absent Ingie.

"He won't know for some time, anyway," he began, but she broke in upon his reassurance.

"Next week," she said; "he is being released on Wednesday."

Elks scratched his chin thoughtfully.

"Somebody knew," he said; "he hadn't a partner, either."

Arthur Ingie was indeed a solitary worker. His friends had been unaccounted even by such friends as he had in his acting days—for they had covered a good many of his twelve years before his arrest and conviction.

"Elks scratched his chin thoughtfully."

tion. To the members of his company he was known as a bad payer, and an unscrupulous manager; none imagined that this clever player of character parts was "Lobby" & Sons, Manufacturing Jewellers, Clerkenwell, and other aliases that produced him such golden harvests.

"It was no fault of yours," said Jim Carlton, and she submitted to a gentle pat on the shoulder. "There's no sense in worrying about it."

Elks was examining the lamp under the electric light.

"Bet it's Tokyo," he said, and walked to the window. "That's his graft. He'd make a cat burglar look like a wool-eatin' kitten! Parapets are like the Great West Road. Tokyo—he'd stop to manure his nails on three inches of rotten sandstone."

The identity of the burglar worried Jim less than it did the girl. He had the brain of a lightning calculator. A hundred possibilities of the crime, a hundred possibilities and explanations flickered through his mind, and none completely satisfied him.

An Uneasily Pleased

Unless a * * *

The Spindle Harlow was on the way to becoming an obsession. There was no immense sum of money to be made from discovering the secret, but a convy reward. There was money in the safe if he did not for one moment believe. Ingie was not the type of criminal which hides its wealth in size. He credited him with a dozen banking accounts in fictitious names, and each money in a deposit.

They went back into the paneled dining room. The apartment interested Jim, for here was every evidence of luxury and refinement. The flat must have cost thousands of pounds to furnish. And then he remembered that Arthur Ingie had been convicted on three charges.

Involved in a number of others, which must have produced enormous wealth, either missing or, he thought, a shaky character to produce. This apartment represented some money, and then those for which Arthur Ingie had been convicted.

"Do you know your uncle very well?"

"I don't know him," he said.

"I knew him better many years ago," she said, "when he was an actor, before he fell, before he got into the money."

"Somebody had knocked at the outer door."

"It may be the charwoman," she said, and went out along the passage and pulled open the door.

A man was standing on the mat outside, looking disgruntled, magnificent in his well-cut evening kit and his graceful, off-fashioned, Ingie-style. His money had been taken and twinkled with diamonds; the buttons on his white waistcoat were primitive.

"What was part and parcel with the primitive in the man, so that she saw nothing vulgar in the display."

She was either smiling or frowning under his pale gaze. She had a strange and inexplicable sensation of being in the grasp of a power.

Elks, who was sitting in the chair, was crushed by the sense of his immense superiority. So she might have felt.

"What was part and parcel with the primitive in the man, so that she saw nothing vulgar in the display."

"What was part and parcel with the primitive in the man, so that she saw nothing vulgar in the display."

"What was part and parcel with the primitive in the man, so that she saw nothing vulgar in the display."

"What was part and parcel with the primitive in the man, so that she saw nothing vulgar in the display."

"What was part and parcel with the primitive in the man, so that she saw nothing vulgar in the display."

his plans for a model police station, and when his enthusiasm was required, he did not want to philanthropize.

However public-minded, he had done before. He bought a freesthold plot in Ebury street (which is not a street in the City of London).

It was a model police station at the cost of £100,000, and presented the building to the police commission.

It was a model police office in every respect. The men's quarters above the station were the finest of their kind in the world.

They had the quality of comfort, though they contained the regulation plank beds, and the men's quarters above the station were the finest of their kind in the world.

Typical revenues had their jokes about it; the cartoonists hung their heads at the Government upon the happening.

The city had ceased to think of him as eccentric, they called him "sharpy," and contrasted him unfavorably with his father.

He did not know that you and my friend Carlton were acquainted. And then, in a changed tone: "I hope I'm not too deep."

His voice, his attitude, said as plainly as words could express: "I presume this a police visitation; do not make a mistake."

His voice, his attitude, said as plainly as words could express: "I presume this a police visitation; do not make a mistake."

A Story From London

Concerns Little Old Lady And Her Savings Of A Lifetime

With a stringed brown-paper parcel held on in her hand, the little old English lady propped up in her chair through Birmingham streets.

Very few people gave a second thought to the frail figure or to her parcel. They would have been more interested had they known that the brown paper covered a small fortune.

The little old lady stepped outside the bank, climbed slowly and painfully from her chair, and hobbled to the cashier's counter.

Under the expected gaze of that official, she unsaid her parcel and emptied on to the counter a bundle of notes, some of them so old that they crumbled as they fell.

She said they represented her life savings, and that she wanted to put them in a safer place than the cupboard in which she had kept them.

The cashier gently explained that he could not accept notes in such a condition and advised her to go to the Bank of England for a loan.

Parcelling up the notes, the little old lady left the bank and off went the wheel chair again.

At the branch office the surprised cashier was able to count up to £150 (about \$700), but there were so many small pieces of paper that he checked that the total sum must have been considerably more.

There were tears in the woman's eyes as she saw so much of her savings in pieces, but she was comforted by the promise that she would receive the full sum.

The bank sent off the notes to a special department, where experts will piece together the scraps.

When the puzzle was put together, the little old lady will be able to draw her savings in brand-new notes whenever she likes.

When she will want to draw the Canadian National Exhibition.

Remarkable Escape

British Submarine Returns To Home Base After Striking A Mine

The naval correspondence of the Daily Herald revealed that Lieut. Commander John W. McCoy brought home the submarine Triumph, sister ship of the Trout and the Trilium, in a triumphal ship.

The Triumph was seen after 14½ feet of her bow had been blown off by a mine.

Lieut. Commander McCoy has been awarded the Distinguished Service Order, "for outstanding initiative and resource when a mine struck her bow and she was in a particularly dangerous position."

After being the voyage home her captain, saw less than 30 feet away from floating mine.

"There was no chance to avoid it. A bump and explosion. The bow of the Triumph was in the air. But the watertight doors behind the forward torpedo tubes were shut."

The Triumph was seen after 14½ feet of her bow had been blown off by a mine.

Scene Of Feudal Battles

Norse Kings Fought Where Allies And Nazis Now Meet

British and German troops, in their contact for Norway, are fighting in the scene of a monumental battle in the centuries-old ruins of ancient Norse kings and their feudal battles.

Stikstad, 12 miles north of Trondheim, is the scene of a monument recalling the battle of July 19, 1030, in which Alf II Haraldsson

—called "the Fat" in his lifetime but known as St. Olaf afterwards—was the son of Alf I, Trygvasson, who was a slave in Estonia but who enforced Christianity upon Norway and fought to unite the country under a single king.

The Norwegian warship Olaf Trygvasson, which opposed the German naval attack on Oslo, was sunk in the battle.

Olaf II, after years of fighting the Danes in England, returned to Norway in 1030 and defeated King Svein, soon had more power than any of his predecessors.

He enforced Christianity throughout the kingdom, asserted his rule over the Orkney Islands, humbled Sweden, and raised Denmark, but he was not a conqueror.

He was a man of peace, and with the invading King, the Great of Denmark. It was in this war that he fell at Stikstad.

After his death, miracles were reported from his tomb and he was canonized in 1164 and declared the patron saint of Norway.

The Norwegian warship Olaf Trygvasson, which opposed the German naval attack on Oslo, was sunk in the battle.

HIGHER SPEEDS, TEMPERATURES, PRESSURES!

So SCIENCE MADE THIS BETTER OIL

In the more powerful engines in today's cars, trucks and tractors, oil has to be tough to stand the punishment. The New Marvelube, developed in Imperial Oil research laboratories, is specially engineered for these faster, hotter-running engines of today.

Marvelube has long been a leader among motor oils. The New Marvelube retains all the original high qualities—now it also goes through new refining processes which make it even tougher, cleaner and more heat-resistant than before.

So the New Marvelube lasts longer. Your oil bills are lower.

It keeps any engine cleaner, livelier. You get more power from the fuel you use. Upkeep costs are reduced to a minimum.

Take advantage of the new savings this better oil brings. See your Imperial Oil agent about the New Marvelube.

IMPERIAL PRODUCTS

SOLE BY IMPERIAL OIL AGENTS AND DEALERS EVERYWHERE IN CANADA

FOREIGN EXCHANGE ACQUISITION ORDER IMPORTANT NOTICE

As announced by the Minister of Finance, the Foreign Exchange Acquisition Order, 1940, has been enacted by Order-in-Council under the authority of the War Measures Act.

Unless exempted by the Order, every resident of Canada who, on May 1st, 1940, has any foreign currency in his possession, ownership or control, whether in Canada or outside Canada, is required forthwith to sell such foreign currency to an Authorized Dealer (i.e. a branch of a chartered bank) for payment in Canadian dollars at the official buying rate of the Foreign Exchange Control Board.

"Foreign currency", for the purposes of the Order, means any currency (excluding coin) other than Canadian currency and includes bank notes, postal notes, money orders, cheques, travellers' cheques, prepaid letters of credit, bank drafts and other similar instruments payable in any currency other than Canadian currency, and also includes any amount in foreign currency of which a resident has a right to obtain payment by reason of a deposit, credit or balance of any kind at or with a bank, savings bank, trust company, loan company, stockbroker, investment dealer or other similar depository.

The Order does not require the sale of any foreign securities.

The Order does not affect any foreign currency, deposit or securities of any non-resident of Canada and for greater certainty the Order expressly declares that a non-resident visiting Canada for business or pleasure for a period or periods not exceeding six months in the year continues to be a non-resident for the purposes of the Order unless such person enters or has entered Canada with the intention of becoming a permanent resident.

No resident is required to sell any foreign currency if he satisfies the Foreign Exchange Control Board that he held such foreign currency on May 1st, 1940, solely as trustee or agent for a non-resident and that the non-resident's interest therein had not been acquired from a resident since September 15th, 1939, except in a manner approved by the Board.

Under certain conditions stipulated in Section 1 (b) of the Order, a resident who is not a Canadian citizen may be granted exemption, but only after application for exemption is approved by the Board.

No life insurance company incorporated in Canada is required by the Order to sell any foreign currency which it needs for the purpose of carrying on its business outside Canada.

Further particulars may be obtained from branches of chartered banks. Any resident who has any foreign currency in his possession, ownership or control on May 1st, 1940, regardless of amount, should consult his bank at once in order to ascertain the extent to which he is affected by the Order.

FOREIGN EXCHANGE CONTROL BOARD

A MORE BEAUTIFUL CANADA

The old saying that a home is not a home until it is planted in true beauty is ever true. Every unimproved home

in Canada can be made attractive by the judicious use of trees, shrubs, vines, flowers and a well kept lawn. We are influenced by our surroundings to a greater degree than we

sometimes realize. Children are particularly sensitive in this regard. Surely a home in and around which flowers are grown is a better place to bring up children than a home

LADIES SOCIAL CREDIT GROUP MEET

Ladies of the Meadowbrook Social Credit Group met at the home of Mrs. Eford on Thursday and spent a very pleasant afternoon. As many of the members were in Calgary Mrs. Nelson acted as chairman and Mrs. Day as secretary. Roll call was answered by Mrs. Fawcett Beaton and Wags. A note of thanks was read from Mrs. T. Wilson for flowers and all were sorry to learn that she was suffering from poor health. The members were glad to hear of the graduation of a member, Miss Verena Taylor, as a nurse and wish her every success. Arrangements were then made for Mother's Day tea to be held in two weeks at the home of Mrs. Hayes. Mrs. Day then entertained with an exceptionally good content. A very bounteous lunch was then served by the hostess and her helpers.

Mr. and Mrs. Geo. W. Evans attended the graduation of their daughter, Allison, at Edmonton on Friday May 3rd. Allison won the gold medal for highest average in three years theory given by the medical staff of the Misericordia Hospital.

Who knows what the harvest will be? One old timer sells his seed wheat and says it is too late now to sow wheat; he will sow oats, barley or something else. Another old timer grades up the wheat and says he believes now is the time to sow wheat and that the district will have a big crop.

ST. ANDREW'S CHURCH

Service Sunday May 12th. Evening song at 7:30 p.m.
Rev. L. H. Pearson, incumbent.

CARD OF THANKS

Thanking many of our friends for their kindness in our recent bereavement.

YULE FAMILY.

where no attention is paid to these friends of the plant kingdom. If children are taught to love flowers and become familiar with them they will be filled with love for these things and there will be less room in their hearts and minds for the things that hurt and destroy.

Canada is a land of rare beauty from the 49th Lake to Cape Breton Island to the mountain ranges of the Pacific coast. Nature has endowed this country with the most beautiful and the greatest variety of natural scenic grandeur to be found anywhere in the universe, mountains, lakes, streams, forests, plains, waterfalls, all are to be found in great abundance. These things which are unsightly and unlovely are made by man and it would seem that the least we can do is to make these man-made places sufficiently attractive that they will, in some measure at least, be in keeping with the great natural beauty to be found throughout this great Dominion.

There are many good reasons why every householder, rural or urban, should do his or her part toward making the home surroundings attractive. In the first place, the money spent for nursery stock or other planting material is a safe investment and will increase the value of a home to a much greater extent than the amount spent for planting material. Further, in the full and satisfactory life there must be found time for both mental and physical relaxation and where one can find a more satisfactory place to get away from air time stress and strain than among the flowers of the garden.

Another reason for putting in a special effort in home beautification work just now is to make Canada more attractive to tourists. The tourist trade from the United States is very important to Canada at the present time and anything that can be done to help increase it will be a benefit to the Dominion as a whole.

We frequently meet with the objection that gardens and flowers cost too much or that they take too much time. The truth is that it is not so much a matter of time or money as it is of desire and disposition. If we are disposed to have garden and flowers and attractive home surroundings, we will have them no matter how busy you may be. Your nearest experimental farm or agricultural school will gladly give you information regarding suitable varieties of planting material for its district in which you live. The investment that you make of time and money in this connection will pay dividends in satisfaction and if you make your home more attractive you have helped to improve the town or community in which you live. If you help to make your home town or community more beautiful you have helped to make a more beautiful Canada.

(Continued from page one) WORLD OF WEATH

field after his crop had been sown, and in the other half of the plots the elevator agents carefully pulled the weeds every few days during the whole course of the growing season.

The harvested material was analyzed by the Dominion experimental farms at Ottawa, and the results of this experiment are most interesting. They reveal that for the average of the three provinces the wheat plots (using Thatcher wheat) that were weeded gave 42.9 bushels to the acre, and the plots that were not weeded gave 38.6 bushels to the acre, which means that when the weeds were controlled an increase of 0.3 bushels to the acre, or 17 per cent more, was realized.

These results show clearly that money and time spent by a farmer in keeping down weeds in his fields should return handsome dividends.
